

Spring Savings

An Iron Fireman professional tune-up gives you the comfort of knowing that you're running SAFELY and at PEAK EFFICIENCY, and reduces your chance of a breakdown.
*** **QUALITY IS THE KEY** ***

A few facts...

A Clean Condenser Coil - Dirty condenser coils raise refrigerant pressure higher than needed, increasing your electric bill.

Unit Wiring - will be inspected and loose connections will be tightened. Loose connections can lead to motor compressor failure.

Thermostat - will be checked and calibrated as required. Improperly calibrated thermostats allow the unit to run longer than necessary, adding to the cost of cooling.

Condensate Drain - will be checked to assure it is not clogged. Algae can plug a drain, which can cause expensive water damage.

Motors will be lubricated, cleaned and inspected. Dirty motors are less efficient and will fail sooner.

Top to Bottom - Inside and Out - Any Brand, Any Time

WE EMPLOY NATE CERTIFIED TECHNICIANS

21 Point Clean and Check	Serviced by May 15	Serviced by By June 15	Serviced June 16 & on
